

COVID-19 Vaccine Booster Shots

Everyone ages 16 and older can get a COVID-19 booster shot

Why do we need a booster shot?

Boosters improve your protection against COVID-19, including the Delta variant. The COVID-19 vaccines are working well to prevent severe illness, hospitalization, and death. Data show that receiving a booster shot increases the body's immune response.

When do you get a booster?

If you received the Pfizer or Moderna vaccine: At least 6 months after your second shot

If you received the Johnson & Johnson vaccine: At least 2 months after your shot

Which booster should I get?

Teens 16-17 years old can get the Pfizer booster.
Adults 18 and older can get any of the COVID-19 vaccines authorized in the United States.

Get Vaccinated

To find a vaccine near you:

- Visit [vaccines.gov](https://www.vaccines.gov)
- Call 1-800-232-0233
- Text your zip code to 438829
